

# GILIYAL GLOBAL

Nurturing Roots. Forging Routes.

We are the export-focused extension of our 42-year-old family manufacturing business, Giliyal Industries, based in Bangalore, India.

Built on engineering discipline, precision fabrication, and generational expertise, we specialise in delivering reliable, high-performance industrial airflow solutions to global buyers.

**Every product we ship reflects our core values:**

**Integrity, Consistency, Engineering Clarity, and Long-Term Partnership.**

# Our Product Range

## Centrifugal Air Blowers

Available from 0.5 HP to 100 HP, our centrifugal blowers are engineered to deliver reliable airflow performance across a wide range of industrial applications. Drive type is chosen based on application.

Direct Drive High-Pressure Blowers   Indirect Drive Blower- Coupling Drive   Indirect Drive Blower- V-Belt Drive

### Direct Drive Centrifugal Blowers

Compact, efficient, and low-maintenance blowers designed for stable, consistent airflow. Direct motor coupling ensures minimal power loss, reduced vibration, and smooth operation.

Ideal for clean-air movement, ventilation lines, cooling systems, and continuous-duty environments.

### Coupling Drive Centrifugal Blowers

Engineered for high static pressure and robust performance. The flexible coupling ensures efficient power transfer, reduced wear, and stable operation under continuous load.

### V-Belt Drive Centrifugal Blowers

Heavy-duty blowers built for high volume higher temperatures, and demanding industrial conditions. V-belt configuration allows flexible speed control and easy maintenance.

Suitable for dust extraction, furnaces, filtration units, and process industries requiring robust performance.

# Our Product Range

## Axial Fans & Man Coolers

Heavy-duty mancoolers engineered for powerful, focused airflow in industrial workspaces. Featuring balanced impellers, durable construction, and continuous-duty motors.

High-efficiency axial fans designed for large airflow at low to medium pressure. Built with aerodynamically profiled blades and robust casings for reliable industrial ventilation.

Axial Fans

Man Coolers

## Spares and Bundles

Our integrated spare part bundles offer a complete replacement solution for most centrifugal blower models. They combine all key operating components in a single export-ready package.

Designed for quick installation and reliable compatibility with standard Giliyal blower frames, these bundles ensure minimal downtime and maximum efficiency.

# Our Product Range

## Spares and Bundles (contd.)

Each set includes:

- Dynamically balanced **IMPELLER** for vibration-free operation
- High-efficiency TEFC/IE motors compatible with standard and high-pressure blower models
- Fabricated MS/SS casing engineered to deliver optimal airflow and long-term performance.

Our manufacturing capabilities & custom engineering are built to meet industrial and export requirements and extend to:

- Complete ventilation systems
- Dust collection & Fume extraction solutions
- Auxiliary heating, pumping, and filtering units
